Mr. J.A. Kelley,
General Manager,
Zonolite Division,
W.R. Grace & Company,
135 South La Salle Street,
Chicago, Illinois 60603.

Dear Joe:

I have enclosed copies of the exchange of correspondence between the Alberta Department of Health and Red Williams, our Calgary branch manager, on the subject of health hazards in our plant in that city.

No doubt, Zonolite has compiled a great deal of information on this subject over the course of time and I wonder if you could pass this file over to someone in your organization who would be able to draw out copies of relevant information and send it to me.

I have written each of our managers and advised them to be sure that all plant regulations pertaining to mixing of products containing asbestos are enforced and to see that an adequate supply of respirators in good shape and filters is maintained. If you have any other comments or suggestions, I would very much appreciate receiving them.

Yours very truly,

N.F. Bushell,
Manager, Zonolite Products.
